

TYPE - 4A

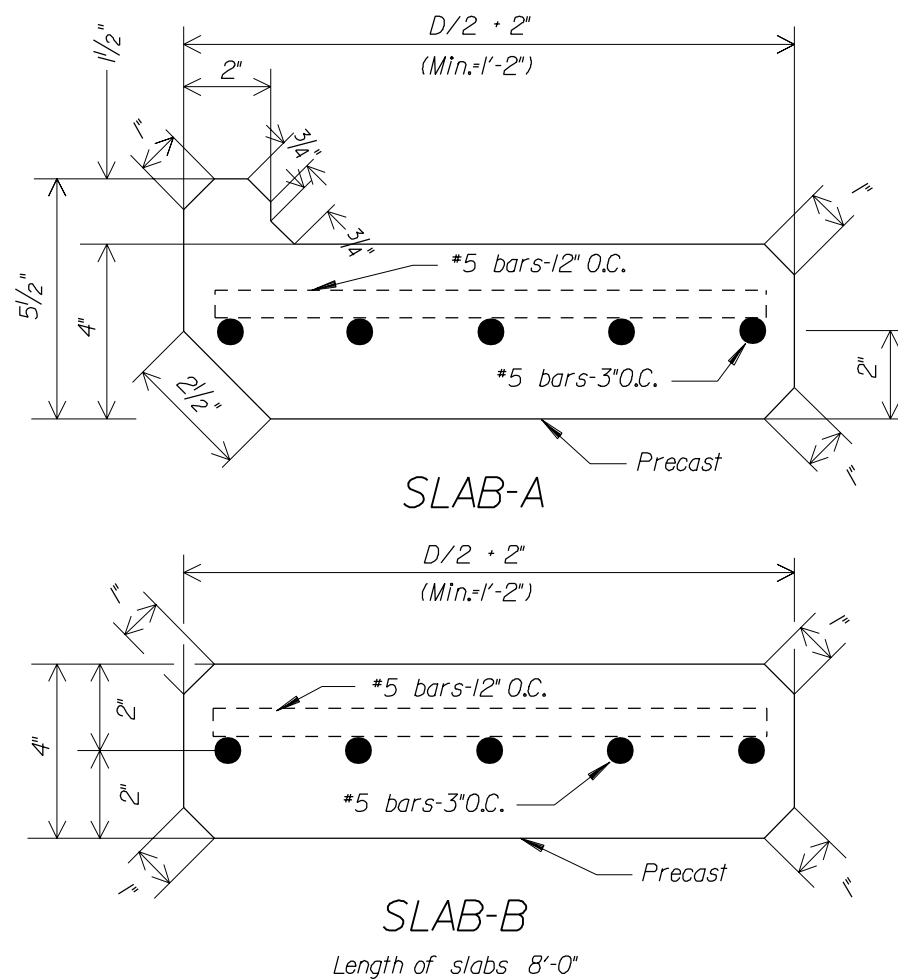

TYPE - 4B

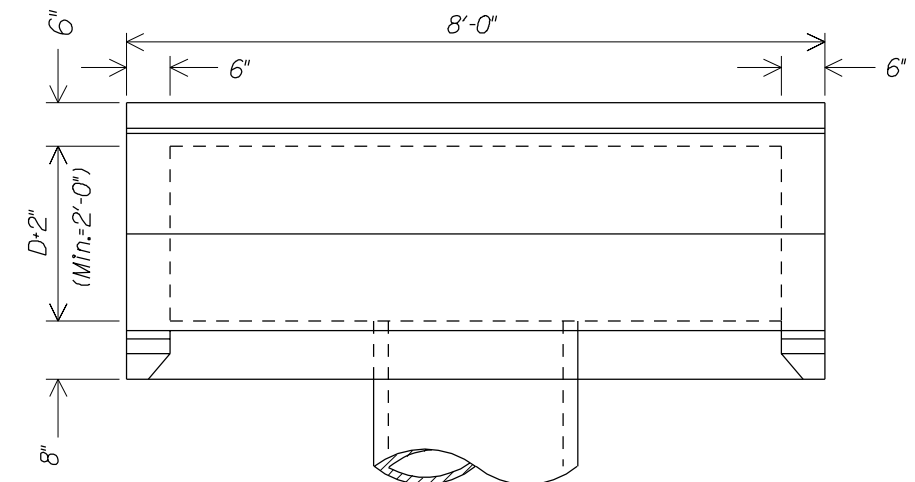

TYPE - 4C

Note: In rock without backwall or floor.
Reinforce same as Type 4A

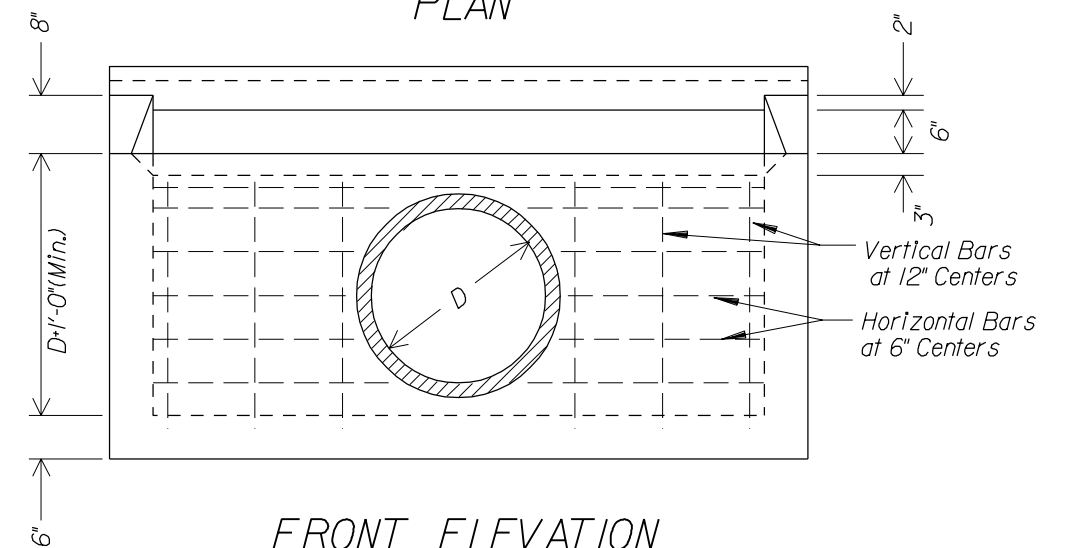

Notes:

- At the option of the Contractor, walls less than 4 feet deep may be of concrete or concrete block.
- Inlets to be parallel to roadway centerline and grade. For pipes on skew, adjust inlets as directed.
- Ditch or paved waterways to be warped and widened near inlets as directed by the CO, to facilitate drainage and to protect slopes at ends of inlets.
- For payment purposes, one slab A plus one slab B or two slabs B constitute one concrete cover.
